For our Client we are looking for:

Software Engineer C++

The role involves design, development, implementation and testing of new desktop applications, libraries and utilities as well as the opportunity in future (not required) to lead small teams of software engineers as part of larger product development and technology projects. The successful applicant will be able to write robust, reliable code that is appropriate for consumer products, whilst also being able to turn around new designs rapidly during the prototyping phase. Knowledge of networking, graphics and multi-threaded programming is essential. Demonstration of experience in all areas of the software development lifecycle for multiple projects will be required. Ability to cooperate within multinational and globally spread software development infrastructure is basic requirement.

Key requirements:

- Strong C++ (preferred proven experience of +3 years minimum)

- Win32 programming knowledge

- Experience in software development for Windows NT, XP, Vista

- Very good scientific/engineering degree or equivalent

- Multi-threaded environment experience

- Experience of OOAD

- Excellent communication skills

- Experience in leading teams (optional)

- Flexibility- ability to work between high and low-level software

- Have worked on difficult technical problems involving the whole lifecycle

- Ability to learn new technology quickly

Desirable requirements:

- Agile software development methods

- Software projects development management tools understanding and experience.

- Graphics programming experience

Additional:

- Willing to participate in the first 2-4 weeks training period being an adaptation phase located in Cambridge UK, office

- Ready to join the DisplayLink team for permanent work in Katowice location

- Ready to participate in international projects requiring short time visiting UK due project consultancy, meetings and communication needs.

- Fluent English language allowing effective work in multinational and globally spread teams

Benefits package includes:

- Competitive Salary dependent on experience and qualifications

- Annual holidays according to Labour Law Code

- Additional Health Insurance package including full medical and hospital care for employee and his family

- Relocation Expenses as appropriate (for Katowice location)

- Employee Referral Bonus

- Subsidized Gym Membership/Usage

- Self-renewing company fridge and snack shelf
